

Electric E-20

Small electric brushing device with a powerful motor. Excellent for cleaning ducts with a diameter of 100–400 millimetres.

The E-20 brushing device is perfect for small ducts. It is very easy to use and move because of its small size and turning front wheels. Due to used materials and carefully selected components it is also very light to handle. The weight of the whole equipment in operating condition is only 30 kilograms.

The equipment is designed to be user-friendly. Standard features include: stepless speed control, wired remote control (optional wireless controller) and selection of rotation direction. These operational and physical features make the E-20 a multipurpose device.

TECHNICAL DATA	
Reel diameter	650 mm
Length	700 mm
Depth	365 mm
Height	710 mm
Weight	30 kg
Shaft length	20 m (ø 8 mm)
Supply voltage	1~230VAC / 10A fuse
Max power consumption	2.5A/@230VAC
Rotation speed	Stepless ~200 - 1100rpm

Device	Product code 
Wireless remote starter	203.002.001
Brush set E-20	211.012.001
Vacuum discs E-20 4 pcs	212.001.004
